

Quality ground care
machinery from industry
leading manufacturers,
Ferris, Spider & Ohashi

PRICE LIST 2025

Effective 1 November 2024

Our Brands

The Ferris, Spider and Ohashi brands deliver high quality products – renowned for their ingenuity, productivity, performance, safety and environmental benefits.

You'll find impressive and unique innovations – from the industry's first and only patented suspension system for ride-on mowers from Ferris, to the only 4wd, 4-wheel steer Spider slope mowers capable of mowing up to 60°. Ohashi woodchippers still retain the unique ability to process large timber, despite being much more compact than competitor models.

As the sole, independent UK distributor of these brands, we are dedicated to bringing you industry-leading, professional machinery, with support from our highly experienced Area Sales Managers and knowledgeable parts & service support teams.

We also provide:

- Comprehensive product training
- Support for customer field demonstrations
- UK-based aftersales, parts and warranty support
- Dedicated dealer portal for easy product registrations and warranty claims

Ferris HVO Fuels

Sometimes known as Renewable Diesel, HVO stands for hydrotreated vegetable oil and is made by cracking and hydrogenating 100% renewable raw materials like vegetable oils, animal oils and fat feedstocks.

The resulting paraffinic, kerosene-like diesel fuel has a low odour and very little sulphur content.

Most importantly, HVO reduces net CO2 emissions by as much as 90% and can be used as a direct, fossil-free replacement for both red and white diesel.

It's also specially formulated to deliver a cleaner burn and reduce diesel particulates and soot by a massive 80%. So in fact it's not only a key tool to help you reach Net Zero, it's also much healthier for your operators and customers AND means no more blocked DPFs or fuel filters!

HVO is available on the Ferris IS6200Z and IS2600Z.

Reduce net CO₂ emissions by as much as 90%

Why Ohashi?

Ohashi woodchippers are rapidly becoming the go-to compact tracked chipper. Whilst much more compact than competitor models, **Ohashi** woodchippers still retain the unique ability to process large timber.

Models range from 3" (75mm) up to 6" (150mm) capacity – their compact, transportable and low maintenance design provides multiple benefits and labour saving potential. Our machines deliver high quality, environmentally-friendly solutions for you – machines that are renowned for their ingenuity, productivity and safety.

The Ohashi Way

Simply put, **Ohashi** are dedicated to the development of innovative machines – through a reliable, technology-based approach that positively contributes to the environmental challenges faced by the world today.

Since 1988, **Ohashi** have developed agricultural and forestry-focused products that are low-impact – providing a high level of performance and a low level of pollution. They have become widely used throughout the European market, earning a solid reputation for advanced environmental and safety standards.

After efficiently processing trees and branches, our chippers re-purpose the waste to create environmentally-friendly by-products – including organic fertilizer and mulching material. The **Ohashi** logo represents our relationship with the natural world, its limited resources, and how to act responsibly for the benefit of generations to come.
